Dated: 28th February 2023

Second Advisory : Implementation of e-phyto by National Plant Quarantine Organization (NPPO) of India through PQMS

Dear Exporters,

As you are aware that DGFT has issued notification No. 28 (RE-2012)/2009-2014 dated 3rd January 2013 according to which grape being exported from the country is through Grapenet. Now since, the export through Grapenest is mandatory and PQMS is also mandatory for issues of E-Phyto, exporters are reqeustd to adopt newly developed E-Phyto through Grapenet.

The Integration of grape net system is being done with Plant Quarantine Management System (PQMS) implemented by NPPO. As you are aware that the export of grapes to EU countries with residue monitoring protocol is monitored through Grapenet Traceability System, hence, all grape exporters are advised to use the Grapenet system as they were using earlier and may get the PSC from the PQMS system. The provision is being made for directing the PQMS home page from the Grapenet at the Phyto Sanitary Module . The screen shot for better understanding of the process of switching over from the Grapenet system to PQMS system for issuance of PSC is attached for reference.

All grape exporters exporting to Europe are advised for strict compliance of this advisory. Violation of the non compliance of the same will be viewed seriously and necessary action may taken as deemed fit in the cases of non compliance found by APEDA.
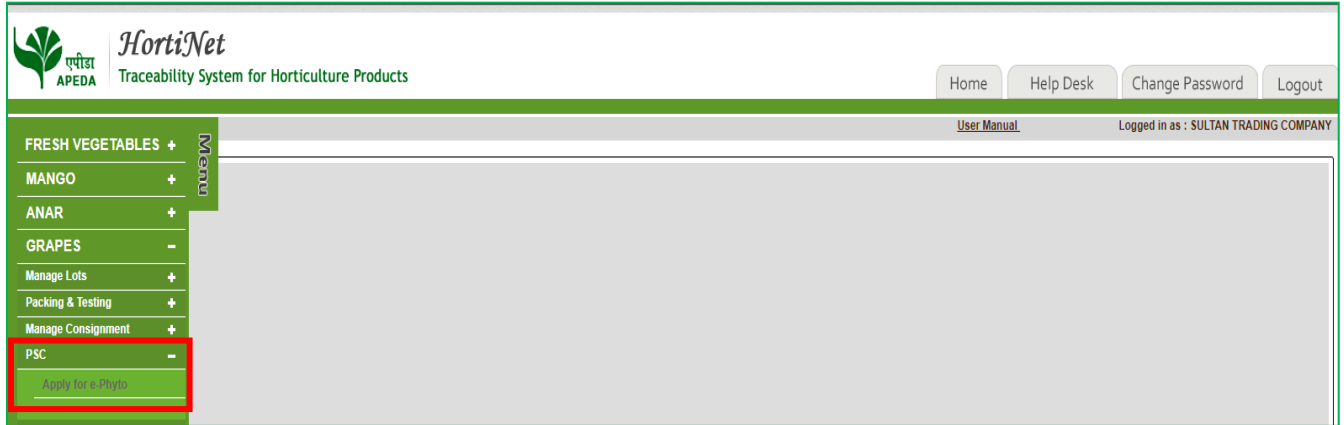

**U.K.Vats
General Manager**

Implementation of e-Phyto by National Plant Protection Organization (NPPO) of India w.e.f. 01 March, 2023 in Grapenet System

Note: Grapenet consignment Id is mandatory for applying e-phyto through PQMS system.

Steps for applying e-phyto through Grapenet System are mentioned below:

Step 1: Exporter has to login in Grapenet system and under the PSC section, select 'Apply for e-phyto'.

Step 2: The exporter will be re-directed to the PQMS system to apply for e-phyto by registering with PQMS System.
